# CV

## My skills as a developer

### Agile methods

- **Scrum**
- **Test driven dev. (TDD)**
- **Iterative and incremental development**
- **Pair programming**
- **Refactoring**
- **Capturing requirements**

### Frontend

- **JavaScript (ES6)**
- **React.js**
- **CSS, SASS**
- **HTML**
- **TypeScript**
- **React Native**
- ○ **Cypress**
- ○ **Jest & Enzyme**

### Backend

- **Ruby on Rails**
- **PostgreSQL**
- **GraphQL**
- **Node.js**
- **Express**
- ○ **RSpec**
- ○ **Mocha & Chai**

## Education

## Web development, fullstack

**Craft Academy**, Gothenburg, Sweden                    March - June 2020

14w intensive bootcamp. The course is characterised by a practical approach, giving students a lot of opportunities to develop not only their coding skills, but also teamwork, communication, planning and organising projects, researching, debugging and more. I received a [certificate of excellence](#), upon successfully completing the course. Main content:

- Building front- and backend applications, mainly in React.js and Ruby on Rails
- Practising Scrum and Agile methods, such as:
    - ○ Test driven development, mainly using Cypress and RSpec
    - ○ Pair programming
    - ○ Continuous Integration and Continuous Deployment (CI / CD)
- Utilising Version control, using Git and GitHub
- Theory about application structure, HTTP and the request/response cycle

## Technology Programme

**Åkrahällskolan**, Nybro, Sweden                    Aug 2012 - June 2015

Equivalent to high school education, with specialisation in design and product development. Main subjects were math, construction, technology and physical science which I enjoyed a lot. I see many correlations between math and programming.

# Work life experience

## Carpenter

**Mark & Grund AB**, Vännäs, Sweden                                    Sep 2019 - Feb 2020

As a carpenter in a construction groundworks company I would mostly build fences, sandboxes and assemble playground equipment in connection to laying the foundation for schoolyards, parking lots and so on. We also built the exterior of an extension of a villa, and quite often I would do groundworks tasks with the others, such as preparing the ground for asphalt and casting bicycle stands.

## Nursing assistant

**Umeå municipality**, Tavelsjö, Sweden                                    Feb - Aug 2019

Working in home care service, my main responsibilities were to give medicine including insulin, cook and serve food, give social support, clean and help with personal hygiene.

## Odd jobs

Norway and Sweden                                    Oct 2017 - Feb 2019

For a period of about 18 months, I got the opportunity to work with a lot of different jobs, with everything from chicken production, waste disposal and shoveling snow off of roofs to graphic design and woodwork. It gave me very different and valuable experiences and I learned that having the opportunity to keep improving and learning is very important to me.

## Social/youth worker

**Gjennestad VGS**, Stokke, Norway                                    Aug 2016 - June 2017

My responsibilities were to plan out and arrange activities and events for students at a boarding school, and in other ways contribute to the social environment there. The work hours were mostly evenings and weekends.
